kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.  
Your utility company uses it to compute your bill. Only standard size clothes  
washers are use in this scale.

**Clothes washers using more energy cost more to operate.**

**This model's estimated yearly operating cost is:**

**\$15**

when used with an electric water heater

**\$9**

when used with a natural gas water heater

Based on eight loads of clothes a week and a 2004 U.S. Government national average cost of 8.60¢ per kWh for electricity and 91.0¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and use of the product.
